

## Environmental Policy Statement

Alloy Fabweld Ltd operations are undertaken with full consideration to the impact that they may have on the environment, and we are committed to minimising impacts, continuous improvement, and prevention of pollution.

To achieve this, the Alloy Fabweld Limited is committed to:

- Work in accordance with our Environmental Management Procedures
- Assessing our activities, products and operations to identify the significant environmental aspects and impacts associated with those activities, products and operations on construction sites and on the railway network.
- Compliance with existing relevant environmental legislation and our client's specific environmental requirements
- Compliance with appropriate industry standards and codes of practice
- Monitoring our performance against environmental objectives and targets
- Providing employees with appropriate training, information and awareness on environmental issues relevant to our activities
- Striving to minimise significant dust, noise and vibration nuisance
- Improving our management of waste and whenever possible reducing our use of landfill by elimination, re-use or re-cycling
- Improving equipment/vehicle energy consumption and reducing pollution by using modern, regularly serviced plant and equipment
- Avoiding spillages and ground/water contamination by good working practice
- Effectively communicating our environmental policy to employees, contractors, suppliers and the general public
- Implementation of this Environmental Policy and Alloy Fabweld Ltd Environmental Procedures is the responsibility of all employees within the company.

This policy will be reviewed annually.
